Nitrogen Filled Tires Save Money

Chapel Hill Tire Car Care Center has been working with the Town of Carrboro to increase their vehicle fleet's fuel efficiency through the use of NitroFill™ tire inflation technology. Tested on eleven vehicles over a four month period, the entire fleet on average received 3.98% greater mileage by utilizing the NitroFill system. The police department saw a dramatic 14% increase in fuel savings over the same period with one vehicle reporting an astonishing savings of 18.13%. "This really doesn't surprise us," said Marc Pons, President of Chapel Hill Tire Car Care Center. "Our customers have been saving money and reporting favorable gas mileage improvements for over a year through the use of NitroFill. They are now starting to understand what NASA, NASCAR and the airline industry have known for years. NitroFill improves tire performance by reducing rolling resistance which helps our environment by lowering gas consumption."

Chapel Hill Tire Car Care Center, with three locations, on Franklin Street (919-967-7092), in Carrboro (919-967-7058) and at Cole Park Plaza (919-960-6001), has been providing total car care services to the greater Chapel Hill area for more than 50 years. Their ASE-certified technicians perform diagnostics and repairs for all vehicle makes and models, both domestic and import.
